

INSTRUCTION A06/2014

Management and Evaluation of Guarantees

1.September.2026

Versions Index

01.Jul.2014

Initial Version

14.Mar.2016

Elimination of the provisions related to bank guarantees and credit lines.

10.Apr.2019

Elimination of the provisions related with the acceptance of financial instruments issued by Federal Republic of Germany and Kingdom of Spain.

01.Feb.2021

Introduction of concentration limits by type of guarantee to Participants.

21.Apr.2023

Reintroduction of the provisions related to CIG (Bank Guarantees and Credit Lines).

23.Oct.2025

Introduction of provisions related to the contingency model for establishing cash collateral. Update of some concepts related to the TARGET system and references to the process of transferring cash to the OMIClear account, following the migration to the new TARGET services and the entry into force of ISO20022.

1.Sep.2026

Amendment to the Instruction to allow collateral in the form of financial instruments to be provided to OMIClear through a Financial Pledge with right of use or by way of fiduciary transfer.

This document is available in www.omiclear.pt

Pursuant to its Rulebook, OMIClear approves this Instruction which sets the conditions for the constitution, release, allocation and evaluation of Participant's Guarantees.

General Provisions

1. Guarantees are set up by the Participants and aim to cover their responsibilities thereof in each of the Services provided by OMIClear, in accordance to the applicable rules.
2. OMIClear defines in a specific Instruction for each of its Services, the rules underlying the value of Guarantees required of Participants and their deadlines for constitution.
3. The setting up of Guarantees with OMIClear requires the conclusion of a Financial Guarantee Agreement on the fiduciary transfer and financial pledge of financial instruments between the Participant and OMIClear.
4. For the purpose of setting up the Guarantees, the following will be accepted by OMIClear:
 - a) Cash, in euros; and
 - b) The financial instruments representing the public debt, issued in Euro by countries of the Euro Zone that are published in its Website.
 - c) Guarantees issued by a Credit Institution (CIG), namely Bank Guarantees or Credit Lines.
5. Notwithstanding paragraph (4) above, OMIClear may restrict the acceptance of some types of assets for a given Service if its underlying rules so require, or if it considers it more suitable for the safety of the Service concerned.
6. The legal framework for setting up Security Interests with OMIClear varies according to the type of asset:
 - a) Cash collateral is set up through any legally accepted form of fiduciary transfer, in which OMIClear becomes the full owner of said Collateral;
 - b) Guarantees in financial instruments are made by means of a Financial Pledge, with the right of use, or fiduciary transfer.

Constitution, Allocation and Release of Collateral in General

7. For the purpose of this Instruction, Collateral Balance (CB), in a given Service, is the difference between the value of the Guarantees, after the application of haircuts, and the value of the responsibilities of the Participant in that Service.
8. For each constitution or release of Collaterals, the specific Model available on the Website must be sent to OMIClear, duly completed.
9. In the constitution of Guarantees, the Participant uses the model referred to in the preceding paragraph, indicating its allocation with the following disaggregation:
 - a) Service to which the Guarantee is allocated;
 - b) Within each Service and where applicable:
 - i. If the Guarantee is owned by its client, particularly in situations where individual segregation or omnibus segregation is applicable;
 - ii. If it is an own Guarantee, in which case the Participant must also specify if it is intended to cover:
 - I. Own responsibilities;
 - II. The responsibilities of its clients.

10. Pursuant to paragraph (9) above, the allocation of the Guarantee to each Service is made in accordance with the following procedures:
 - a) For a monetary amount, when the Guarantees are made in cash or by a CIG; or
 - b) For a certain quantity of financial instruments.
11. The above mentioned allocation may also provide a greater level of detail, including other relevant information related to each Service.
12. When, for any reason, the Participant does not indicate the Service to which a certain Guarantee is assigned, OMIClear will retain that Guarantee, and may use it for any Service if needed.
13. Any change to the allocation of the Participant's Guarantees:
 - a) Must be made by resending the specific Model available on the Website, duly completed, to OMIClear.
 - b) Cannot generate a negative CB in any of the Services.
14. If, at some point, the value of responsibilities taken by the Participant in a given Service exceeds the value of the Guarantees allocated to it, i.e., if the CB is negative, the Participant must reinforce the necessary Guarantees in accordance with the applicable rules or, if there is a surplus of Guarantees, re-allocate them, in accordance with the provisions in the preceding paragraph.
15. The release of excess Guarantees of a Participant, in a given Service, is allowed only if the responsibilities in all other Services in which it participates are covered, i.e., if the CBs concerned are all positive.
16. Any payment received on behalf of the Guarantees set up by the Participant are assigned proportionally to the Guarantees allocated to the various OMIClear's Services, unless the Participant requests a different allocation.
17. OMIClear regularly provides to the Participant a report with the breakdown of the assets given as Collateral and their allocation to OMIClear's Services.

Use of Guarantees in case of Default

18. If a Participant enters into default regarding a certain Service, OMIClear will adopt the following procedures:
 - a) In a first phase, OMIClear only mobilises the Guarantees allocated to that Service to cope with the default concerned;
 - b) In a second phase, if the Guarantees referred to in paragraph (a) above are insufficient, OMIClear may use the positive CB of other Services to solve the default in the manner it deems more appropriate for the protection of the market.
19. In accordance to paragraph (9) and notwithstanding the provisions in the preceding paragraph, if after the resolution of a default procedure for a given Service it is found that there are still free and available Guarantees, before they are returned to the Participant these Guarantees may be used by OMIClear to solve a possible loss or a negative CB in any other Service in which the Participant is also involved.

Constitution, Release and Remuneration of Cash Collateral

20. The constitution of cash collateral with a value date of D must be made until the cut-off time for interbank transfers in the RTGS module of the T2 system, currently at 17:00 of D.
21. The constitution of cash collateral is made by transfer by means of an ISO20022 pacs.009message (Financial Institution Credit Transfer), which must include:

- a) In the Financial Institution Identification field of the message Header and in the Instructed Agent, Creditor Agent and Creditor fields of the message Body, the BIC of OMIClear as a Direct Participant: OMICPTPLXXX.
 - b) In the Remittance Information field, the identification of the name of the Participant or of the clearing account to which the constitution of the Guarantees refers to.
22. Cash collateral will be considered from the moment the OMIClear's RTGS account on the T2 system is credited and cumulatively if the specific Model available on the Website is duly completed.
 23. To release cash collateral with a value date of D, the Participant must send the specific Model available on the Website duly completed until 11:00 of the previous business day that is not a national holiday in Portugal.
 24. When OMIClear proceeds to the financial investment of the cash collateral, it may allocate part of the resulting income to the Participants that have set them up, whatever the modality through which the cash collateral was set up, in accordance with the terms published on the Website.
 25. The incomes referred to in paragraph (24) above are incorporated in the cash collateral of the Participant concerned, in accordance with the provisions in paragraph (16).
 26. On a yearly basis, OMIClear sends to each Participant, the statement of the income paid and tax withheld in the preceding year, in accordance with Participant's taxation.
 27. The constitution and release of cash collateral may be subject to the payment of fees, as defined in the Price List.

Constitution, Release and Remuneration of Guarantees in Financial Instruments

28. For the purpose of Guarantees, OMIClear only accepts financial instruments free of liens and charges, owned by the Participants.
29. OMIClear only accepts the constitution of Guarantees representing public debt corresponding to a nominal value of no less than €10,000 (ten thousand euros).
30. OMIClear evaluates the Guarantees in financial instruments on a daily basis.
31. The value of financial instruments considered for the purpose of Guarantees corresponds to its market value adjusted by a discount (Haircut), plus accrued interest, if applicable, in accordance with the following formula:

$$\text{Value of Guarantee} = \text{Market value} \times (1 - \text{Haircut}) + \text{Accrued Interest}$$

32. Haircuts are defined by the product of a factor (H1) linked to the volatility of asset prices and another factor (H2), determined based on the liquidity of assets and the respective amount deposited by the Participant, being the product of both factors rounded up to the nearest 50 basis points:

$$\text{Haircut} = H1 \times H2$$

33. The values of factors H1 and H2 are published on the Website.
34. In cases of instability or abrupt changes in the relevant market of the financial instruments accepted as Guarantee, OMIClear may, upon notice to the Participants, immediately change the Haircuts, as well as the list of financial instruments accepted as Guarantee, and may even determine the replacement of the financial instruments.

35. The Guarantees constituted in financial instruments are registered or deposited:
 - a) In segregated accounts opened by OMIClear with operators of securities settlement systems recognised in accordance with Directive 98/26/EC of the European Parliament and of the Council, of 19 May 1998;
 - b) In individually segregated accounts held by the Participant with a Central Securities Depository operating securities settlement systems and subject to the regime established under Regulation (EU) No 909/2014 of the European Parliament and of the Council of 23 July 2014 on improving securities settlement in the European Union and on Central Securities Depositories, the Guarantees shall be constituted, inter alia, by way of a Financial Pledge conferring rights of appropriation and disposal in favour of OMIClear, and shall be subject to the acknowledgement by such Central Securities Depositories of OMIClear's rights thereunder.
36. At the request of the Participant, the segregation referred to in the preceding paragraph can take an individual nature, at the level of the account with the operator of securities settlement system.
37. The moving instructions as well as the settlement of the moving involving the constitution or release of financial instruments depend on the type of assets and on the operator of financial instruments settlement systems, so the references published on the Website must be used.
38. At the beginning of each calendar year, OMIClear sends, directly or indirectly, the annual income tax returns relating to the financial instruments set up in the previous year by each Participant, taking into account their tax regime.
39. Regarding the remuneration of the Guarantees set up in financial instruments, including interest, if the Participant does not request its release, the Guarantee will be made as cash collateral, subject to applicable rules, and the Participant will be responsible for allocating it to a given Service, if not the provisions in paragraph (16) will apply.
40. To exercise the rights in respect of financial instruments set up as Guarantees, the Clearing Members must, where applicable, replace them in due time with other financial instruments, to ensure the exercise thereof.
41. The constitution, custody, maintenance and release of Guarantees in financial instruments are subject to the payment of fees, as defined in the Price List.

Constitution of Guarantees through CIG

42. OMIClear does not accept CIGs to cover responsibilities of a Participant, hereinafter also referred to as Collateral-taker, which is a financial counterparty as defined in Article 2 of EMIR.
43. Only the CIGs that meet the requirements defined in an Instruction A07/2014 - Guarantees issued by Credit Institutions will be accepted.
44. The procedures for setting up and managing the CIGs are defined in the Instruction referred to in the preceding paragraph.
45. For the purpose of setting up Guarantees, the CIGs may be subject to Haircuts, disclosed in OMIClear's Website, other than the Haircuts related to the concentration limits, which are defined in the following paragraphs of this Instruction.
46. The constitution, custody, maintenance, modification and release of Guarantees set up in CIGs are subject to the payment of fees, as defined in the Price List.

Contingency Situations

47. OMIClear may adopt a contingency model for the provision of cash collateral in the event of a system failure or any other situation that prevents the Clearing Member or Financial Settlement Agent from entering transfer orders into the RTGS component of T2 under the terms set out in paragraph 21.
48. In the contingency situation referred to in the previous paragraph, Participants shall use the contingency component of the TARGET system known as ECONS¹ to ensure the proper settlement of transactions underlying the cash collateralisation process.

Concentration Limits – General Provisions

49. The values of Guarantees deposited by a Participant with OMIClear exceeding their responsibilities are not subject to concentration limits and, for each Participant and, if applicable, for a given Service or set of Services, responsibilities are covered successively by cash, financial instruments and CIG. As such, a Participant may, for example, have set up Guarantees in financial instruments and CIG that are not subject to concentration limits because all their responsibilities are already covered by cash. In determining the active portion of each CIG, a pro rata of the responsibilities covered by the CIGs over the nominal value of each CIG is employed, i.e. it is applied to the nominal value of each CIG the ratio between the total responsibilities to be covered by CIGs and the respective total nominal value, taking into account the reality of each Service.
50. Pursuant to the preceding paragraph:
 - a) References to the different types of Guarantees of a given Participant for the purpose of concentration limits shall be made only for the portion intended to cover the responsibilities of the Participant, unless specifically provided otherwise;
 - b) The coverage of responsibilities by the various assets within each type of collateral is done on a pro-rata basis, or according to any other basis, whichever is more favourable for the Participant.
51. The limits involving financial instruments take their market value discounted by the respective Haircuts.
52. In exceptional cases, OMIClear may apply the provisions in the following paragraphs differently, regarding the concentration limits if, based on a reasoned analysis, this is safer for the Service or set of Services; such a decision must be reported to the CMVM.
53. The provisions in the following paragraphs may be adapted if OMIClear limits some type of assets from being accepted for a given Service.
54. For the purpose of concentration limits:
 - a) The relevant values of entities belonging to the same group are aggregated;
 - b) The relevant values of clients benefiting from the individual segregation or omnibus segregation regime are analysed individually;
 - c) The baseline is the Collateral deposited with OMIClear concerning all Services.
55. OMIClear regularly monitors the concentration limits, at least every month.

Concentration Limits Applicable to Issuers

56. OMIClear cannot hold as Guarantees provided by its Participants more than 5% of a given issue of financial instruments, and this is one of the grounds for refusing that asset as collateral.

¹ ECONS (Enhanced Contingency Solution) is a contingency component designed to cover situations in which the T2 service, i.e. the CLM (Central Liquidity Management) component and/or the RTGS (Real-Time Gross Settlement) component, cannot be used.

57. Should there be a reduction in the liquidity of a given financial instrument or set of financial instruments, OMIClear may impose more stringent limits than those mentioned in the preceding paragraph, and/or aggravate the Factor H2 referred to in paragraphs 32 and 33.
58. In accordance with Article 42(4) of the Delegated Regulation 153/2013, the share of Guarantees issued by a single credit institution cannot exceed 10% of the total amount of Guarantees held by OMIClear. This amount may increase to 25% if the value of the CIGs received by OMIClear is more than 50% of all Guarantees deposited with OMIClear.
59. The share of Guarantees in financial instruments issued by a single issuer cannot exceed 25% of all the Guarantees held by OMIClear. This amount may increase to 40% if the issuer is an EU country or equivalent.
60. The total amount of Guarantees represented by financial instruments or CIG under paragraph 49 cannot exceed 85% of all the Collateral deposited with OMIClear.

Concentration Limits Applicable to Participants

61. Without prejudice to the provisions referred to in the preceding paragraphs, Guarantees set up by means of financial instruments and CIGs are also subject to concentration limits per Participant, corresponding to 85% of the total amount of Collateral deposited by the Participant with OMIClear.
62. Without prejudice to the provisions referred to in the preceding paragraphs, the total amount of CIGs pledged by a Participant cannot exceed 85% of the average initial margin amount required to such Participant in the last month.
63. Notwithstanding the preceding paragraphs, the CIGs are subject to concentration limits based on the following factors:
 - a) The joint Risk Level defined as the nearest whole number resulting from the following expression:

$$RL_{\text{joint}} = (RL_P \times 2 + RL_G) / 3$$

With,

RL_P - Risk Level reference of the Participant, which is equal to the respective Risk Level except when it has a value of 7, circumstance in which the RL_P shall assume the value of 8

RL_G – Risk Level of the Guarantor
 - b) Value of CIG deposited with OMIClear, taking into account the provisions in paragraph 49 and 50.
64. Taking into account the factors mentioned in the preceding paragraph, the maximum value of CIGs deposited for each Collateral-taker/Guarantor pair is defined in the following table.

Table 1: Maximum share of CIGs issued for a given Collateral-taker/Guarantor pair

CIG *		Joint Risk Level						
De	A	7	6	5	4	3	2	1
0	2	100%	100%	100%	100%	100%	100%	100%
2	5	85%	100%	100%	100%	100%	100%	100%
5	10	70%	85%	100%	100%	100%	100%	100%
10	20	55%	70%	100%	100%	100%	100%	100%
20	40	40%	55%	85%	100%	100%	100%	100%
40	60	25%	40%	75%	100%	100%	100%	100%
60	80		25%	65%	100%	100%	100%	100%
80	100			55%	75%	100%	100%	100%
100	150			45%	65%	85%	100%	100%
150	200			35%	55%	75%	100%	100%
200	250			25%	45%	65%	85%	100%
250	WL				35%	55%	75%	100%

* Million Euro

WL - Without Limit

65. Under the previous table:

- The first two columns represent the total value of the active portions of the CIGs, under paragraph 49, provided as a Guarantee given by a certain Collateral-taker, and, in each row, the interval open on the left and closed on the right;
- The percentages represent the maximum share of the value of CIGs issued by a certain Guarantor in the set of Guarantees in CIGs deposited by the Collateral-taker. For instance, a Collateral-taker with a Risk Level 5 can have a maximum of 34 million euros of exposure covered by CIGs issued by a Guarantor with Risk Levels 5 or 4, if the total value of its active CIGs is 40 million euros.

66. The Collateral-takers with a Risk Level of 7, 6 and 5 are subject to maximum use of CIGs, respectively, 60, 80 and 250 million euros.

67. When the amount of CIGs issued by a Guarantor for a Collateral-taker exceeds 50% of the exposure limit given by OMIClear to the respective Guarantor, OMIClear will apply Haircuts (H3) marginally increasing in 5% for each block of 10% in excess compared to the already mentioned 50% of exposure limit.

68. The Haircut referred in the preceding paragraph may be either incorporated by OMIClear by deducting the nominal value of CIGs provided in Guarantee by the Collateral-taker, as well as maintaining unchanged this value and considering the Haircut an additional responsibility of that Collateral-taker.

Entry into Effect

69. This Instruction has been communicated to CMVM on April 2nd, 2026 and enters into effect on September 1st, 2026.
